Spec v1.

One page of rules for every Shogun screen.
Light only, ruled cells, one signal colour,
mono labels and tight grotesk headlines.

01 / COLOUR	7 VALUES
-------------	----------

Paper	Ink	Strip	Signal	Rail ink	Field	Muted
#F7F7F5 Page ground	#111111 Text, rules, filled controls	#E4E4E2 Header strips, hover rows	#F2592A The rail, the sealed state, needs-you counts	#14301F Text on the signal rail only	FFFFFF Inputs and message bodies	#444444 Secondary text (7.4:1 on paper)

ONE SIGNAL COLOUR
Orange appears in three places only: the rail, the sealed or accepted state, and counts that need you. It never carries text on paper.

LIGHT ONLY
There is no dark theme in v1. Pages are built from the seven values above and nothing else.

STATE BY SHAPE
Pending is outlined, done is filled, failed is dashed. Colour is never the only signal.

-------------	--------------------------

FRAME A 1px ink border around the whole page. A 104px signal rail on the left holds the logotype and a rotated page name. Below 860px the rail becomes a 56px bar.	CELLS Content sits in ruled cells with 22px padding. Cells are divided by 1px ink lines, never by gaps or shadows. No rounded corners anywhere.	PAGE ORDER Strip, tab nav, headline cell (title left, one sentence right), then the work. Every page follows it so the eye learns where things are.
